

INDOOR SENSORS

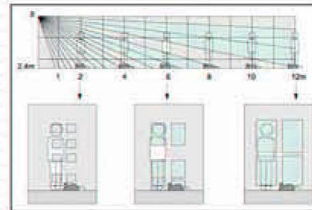

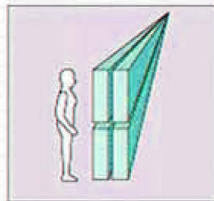

Unique & high performance technology from OPTEX Japan

RX-40 PI

Pet Immune PIR, 40ft x 85 degree wide angle 78 zones of Quad zone logic concept.

The RX-40PI gives extremely high false alarm protection with excellent tolerance to spot temperature changes from curtains, small animals, and pet. Using patented Quad Zone Logic, it is able to accurately discriminate between humans and other sources of infrared, providing reliable detection in a diverse range of applications.

The attractive housing incorporates the unique Optex spherical lens design, which is not only robust, but also helps to maximize the performance of Quad Zone Logic by providing an accurate focal length For each detection zone. Has option to choose pulse count 2 or 4.

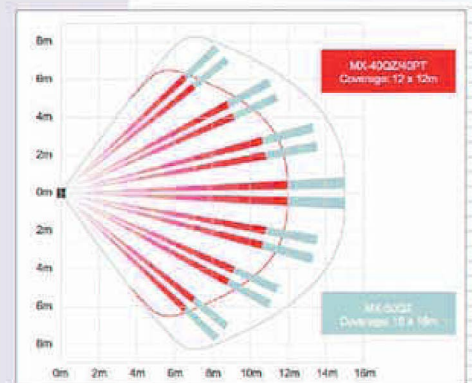

MX-40QZ/50QZ

PIR/MICROWAVE COMBINATION
DETECTOR FOR RESIDENTIAL & COMMERCIAL

The MX Series combines state of the art microwave and PIR technologies in attractive, easy-to-install units and underlines Optex's absolute commitment to provide detectors with unprecedented reliability and detection performance at very reasonable prices. Incorporating Anti-Crosstalk Technology, which prevents false alarms caused by microwave interference when several detectors are operating in the same area, and also Quad Zone Logic, which discriminates between humans and other sources of infrared, the MX Series is unrivalled in its performance.

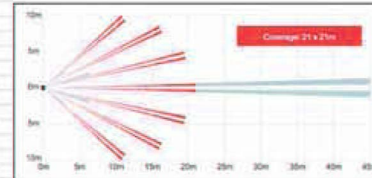

MX-40QZ standard model (12m x 12m with 85 degree coverage).

CX-702

LONG RANGE PIR DETECTOR WITH SELECTABLE DETECTION PATTERN

The CX-702 is designed to give extremely stable long-range detection performance in a variety of internal commercial and industrial applications. With patented Multi-Focus Technology, sensitivity is maintained through the entire coverage area, even in high temperature areas or in applications with low temperature contrast. Combined with Double Conductive Shielding and Temperature Compensation, a high level of false alarm protection is guaranteed.

FX-360

Cost effective with uncompromising Quality

The FX-360 ceiling-mount detector with its unique, highly durable spherical lens offers unparalleled 360° detection performance. False alarm protection technologies, such as RFI Protection, Temperature Protection and Noise Reduction, come as standard, giving the FX-360 the most unbeatable reliability in its class. The FX-360 is extremely cost effective and its sleek and compact design suits all types of installation applications.

Spherical Lens design * RFI protection * Temperature protection
Noise reduction circuit * Selectable pulse count (2 or 4) * LED remote control terminal
