

Slare provides a complete solution for all of your intrusion detection and protection needs. We offer a wide range of wireless systems including panels, detectors, intelligent sensors, sirens and accessories.

Slare is an established player in the intrusion detection and protection field; we provide exclusive patented solutions monitoring. All our intrusion detection and protection products are designed to operate and built to last the distance. Our products are made of high quality materials based on innovative manufacturing procedures that have been designed for all environments. We provide security products with enhanced reliability.

Wireless Peripherals

ROSSLARE
SECURITY PRODUCTS

Common Features

Rosslare provides a complete solution for all of your intrusion
and security systems and

Rosslare is an established player in the intrusion detection
industry. All our intrusion detection and

They are made of high quality materials based on innovative manu

- Frequencies: 433.92MHz (G series), 868.35MHz (H series)
- Reported events:
 - Alarm
 - Alarm Restore
 - Low Battery
 - Tamper
 - Supervision every 20 minutes
- Anti-collision proprietary RF protocol
- Integral and internal RF antenna
- 16 Million random ID codes

Wireless Keypad

Rosslare provides a complete solution for all of your intrusion
care systems and

Rosslare is an established player in the intrusion detection
casing. All our intrusion detection and

They are made of high quality materials based on innovative manu

- Fully wireless keypad (operates on batteries only)
- Bi-Directional communication with the HomeLogiX and SecuraCare hosting panels
- System Status, Bypass, Memory and Trouble indications
- Embedded RFID reader (125kHz) for arming and disarming
- Arming Away/Home and disarming using user's PIN code

KE-30

Wireless Infrared Detectors (PIR)

Rosslare provides a complete solution for all of your intrusion
and systems. inc

They are made of high quality materials based on innovative manu

- Advance Technology – Fuzzy Logic Algorithm – Improves Detection and Reduce False Alarms
- Unique Fresnel
- High Quality Pyroelectric infrared sensor
- Mirror look down (with spherical lens)
- Power save technology
- Self test and auto temperature calibration
- Walk & RF transmission tests

PYR-3011

Wireless sensors

Rosslare provides a complete solution for all of your intrusion
 and access control systems. www.rosslare.com

Rosslare is an established player in the intrusion detection
 and access control industry. All our intrusion detection and
 access control products are designed for reliability and performance.

They are made of high quality materials based on innovative manu-

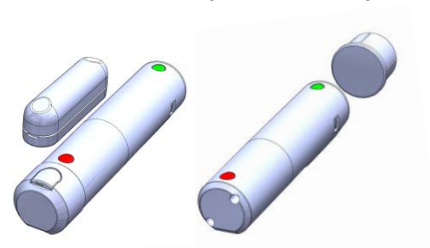

- Door / Window magnetic contacts
- Long life lithium battery
- Easy to install and operate in a wide range of residential and commercial environments
- SA-32 – smallest recessed door contact
- SA-32S – available with shock sensor
- One auxiliary hardwire input (SA-02)
- 2 programmable auxiliary hardwire inputs (SA-25)
- Programming Software (SA-25)

SA-25

SA-32/S

Vibration & Glass-Break Sensors

Rosslare provides a complete solution for all of your intrusion
and systems including intrusion detection
and burglar alarm. All our intrusion detection and
They are made of high quality materials based on innovative manu

SA-20

- Unique 3-in-1 sensor – Vibration, Movement and Magnetic contact
- Each sensor can be activated separately
- False alarm reduction by continuously monitoring the surroundings

SA-20

SA-19

- Sentrol pattern recognition sensor
- Wide 360° detection range

SA-19

Wireless Smoke & Heat Sensors

Rosslare provides a complete solution for all of your intrusion
and security systems. We are the industry leader in the intrusion detection

and alarm systems. All our intrusion detection and alarm systems are designed for

They are made of high quality materials based on innovative manu

- Ultimate protection for residential and commercial applications
- Compact and elegant design shell
- Can be mounted on walls or ceilings
- Quickly installed and easy to maintain
- Photoelectric sensor (SA-34)
- Maximum temperature (SA-36)
- Max. temp. with heat rise rate (SA-37)
- Optional as standalone

SA-34

SA-36 / SA-37

Remote Controls

Rosslare provides a complete solution for all of your intrusion
control systems and

Rosslare is an established player in the intrusion detection
industry. All our intrusion detection and

They are made of high quality materials based on innovative manu

- Pendant and wrist-band waterproof personal panic (SA-04)
- Hand-held with Belt-clip option (SA-26/7/8)
- Remote controls with 1 to 5 channels
- Sealed soft touch buttons (SA-33)

SA-33

SA-04

SA-26/27/28

INTRUSION

SA-80 Wireless Siren

Rosslare provides a complete solution for all of your intrusion
and security systems including

Rosslare is an established player in the intrusion detection and
alarm industry. All our intrusion detection and alarm products

are made of high quality materials based on innovative manu-

- Suitable for outdoor use, weatherproof
- Powerful siren output level (103dB)
- Generate different type of sound signals (Burglar and fire)
- Strong strobe lamp
- Bi-directional RF communications

SA-80

Universal Receivers

Rosslare provides a complete solution for all of your intrusion
and security systems.

Rosslare is an established player in the intrusion detection
industry. All our intrusion detection and

They are made of high quality materials based on innovative manu

- Convert Rosslare wireless products such as: detectors, sensors and remote controls to a hardwire output
- Compatible with any hardwire alarm panel
- SA-38 supports up to 8 channels (32 wireless products)
- SA-22 supports up to 2 channels (6 wireless products)
- Local and PC software programming

SA-38

SA-22

Single-level Repeater

Rosslare provides a complete solution for all of your intrusion
and security systems. We are a leading manufacturer of

Rosslare is an established player in the intrusion detection
industry. All our intrusion detection and security products

are made of high quality materials based on innovative manu-

- High performance wireless product
- Ideal for residential, commercial and institutional applications
- Cost effective solution for RF range extension needs
- Single Level Coverage
- Rechargeable battery backup with 24 hours of backup power
- No programming required

SA-29
